

Being a ham operator, I am vehemently opposed to Broadband over Power Lines. I am surrounded on three sides by them. How am I supposed to communicate (especially in a public service event) with all that additional noise ? Leave it alone - NO BPL ! I am a Skywarn Spotter, co - founder of one HF Net, and take great pride in my ham activities. The mere thought of the same agency that granted my license sabotaging my efforts is abhorrent. Turn down BPL and preserve our spectrum - it's noisy enough, thank you.
